VIRUS-MITIGATION AIR PURIFIER

## VIRUS-MITIGATION AIR PURIFIER

Bluezone® by Middleby Model 450 makes indoor spaces safe again with patented, ultraviolet air cleaning technology that kills up to 99.9995% of viruses in the air, including SARSCoV-2 (corona-virus). Air is pulled into a chamber, is scrubbed of contaminants, and purified air is returned to the space. The CDC and FDA recommend this type of technology for being effective against airborne transmission.
