*We opened a new hospitality space in the Rogers Arena called Encore. It is a 260 people place where our fans enjoy a food menu from numerous chef stations throughout the space. One of our signature stations is located front and centre in the middle of the action. This station has an Evo EVent 48 series cooking griddle with downdraft ventilation system. It was important to our fans to see their food cooked directly in front of them. We surrounded this unit with a very attractive stone and millwork "shell". Our fans are LOVING this action station. Stating "it is so cool to see the chef cooking everything from croquet monsieur, gyoza, eggs, satays to fried noodles". Given the unique setting we are in it was very important that our fans can see the cooking BUT not smell aroma or grease laden vapor. This unit has been a very successful choice for us. It has exceeded expectations. The cooks and our fans are really enjoying the cooked in front of you experience. Well done Evo! //*
